## Lessons of art and kindness.

30 years... It's not much for our school, but its history is like a fascinating book. Teachers, students, parents! A lot of entrhralling lessons have been conducted at this school, many gorgeous pupils have been learning here! Teachers and students have won olympiads and competitions. All of them have done much for School.

We are proud of our winners and want to be like they are; we're also proud of teachers. Thanks to them we have scientific and spiritual education.

**-Svetlana Alexandrovna, what was a start for the school's story like?**

- I have been working at school for 10 years, so I know the school's history only from teachers' stories and newspapers.

I was invited to work here as a teacher of art department, for lessons of the art history and

lessons of the decorative composition. I dived into a mythology, artistic styles and world art achievements.

I had been living in the world of art without worrying about everyday troubles. Students have surprised us by erudition, talents and curiosity. My colleagues and I organized journeys to cultural regions, Russian cities, France, Czech Republic, Holland, Germany, etc.

**- What is the secret of useful (successful) teaching?**

- I think, there is no secret. Respectable relationship with teacher and children, artistry, sensitivity and love should be added to professional knowledge.

**- What artistic achievements does the school have?**

- The school has a lot of artistic winners! We can enumerate endlessly.

**-Do you like your work?**

-I live for my work!  
Communication with the smartest and kindest colleagues is a pleasure for me. I enjoy opening the world of art for students during lessons.

**-Can you give an advice for students who want to be teachers in future?**

Future teachers need to be sociable, emotional and love children. You can do nothing at school without love and kindness!

**Daria Akstyna**

## In the modern world everyone can be interesting: how and where express yourself?

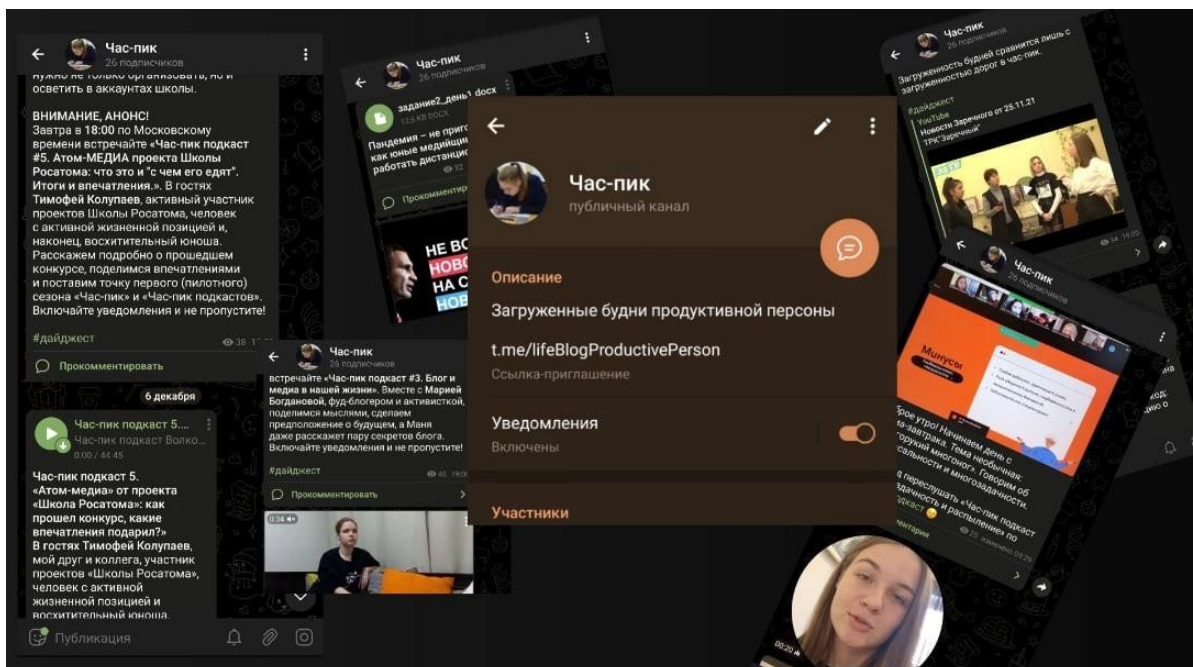

What are modern realities? The world and its forms of communication change quickly and people who don't follow world's trend tend to be out of board. School, work, media, games, communication – everything is changing.

Media has improved greatly: video and audio (except familiar articles) have become popular (YT, TikTok, voice messages, voicecharts, podcasts and etc). People often prefer news web sites, information blogs on social networks. So, it's easy to attract readers' attention now while they are surfing the Net. Surfing the net in free time is a way for self-education, learning of updates and cute communication with authors and other readers.

Everyone can become participant of the remote communication. I was able to become an author. I have my own blog on telegram "Rush hour" is devoted to articles about busy weekdays of teenagers. Digest of news, direct activation of video messages, podcasts are loved by subscribers. By the way, subscribers are my friends who live all over Russia and adults. They are my tutors, Professors of Universities, journalists and my school teachers. Everyone can communicate with me and other readers commenting my news.

The blog hasn't got a lot of followers, but it has many forms of media which are liked by readers. It's digests, podcasts with guests who live all over the country, articles, notes, video and voice messages. Thanks to blog I developed my skills and got my own media style.

The modern world isn't cruel but it helps everyone to be heard, to find friends all over the world, to learn something new. The social networks help to express yourself, the Internet allows you to learn any formats, any profession. So, it's your choice: to become an active participant of information chain and meet with "the e-world" or continue to be a passive watcher.

## From 1<sup>st</sup> person.

### Teacher's way.

#### Mebonia Kristina Gulvardievna

**The start.** I started my career in 2009. So, I have been working as a teacher for 12 years. I like teaching. I guess, that all of teachers like their work, because it is impossible to work at school, if you don't like teaching. I'm really into working with children, specially it's great when you have time to find fascinating extra knowledge to talk to students.

I like lessons when children work with me, when they get knowledge which I give to them. You will get more after that.

We always have some interesting and exciting events at school. But I remember my first students and their graduation day, because it was the first time and there were many emotions. In 11<sup>th</sup> form after successful passing their exams, my students gave me a cake which was decorated like my favorite book «Lord of the Ring» by J.R.R. Tolkien and said many grateful words.

**Tutors.** When I had started to work at school, our head teacher, Larisa Petrovna Derish, started to help me. She was pretty good helper for me as a teacher of Russian language and Literature and as a head teacher of school. Larisa Petrovna shared lectures, gave pieces of advice about lessons. It was a huge

help and it was not only once but it had continued for some years. I'm very grateful to her for it. As for class guide, Valentina Mikhailovna Novikova helped me much. She is a very active and creative person. She taught me to work with children, to organize events. We always stayed together after lessons and she shared experience. At that moment, humane pedagogy was a priority, which still runs through the educational system of the school, we had a club headed by Valentina Vasilyevna Donskaya. Valentina Vasilyevna organized our meetings and we discussed entertaining texts and ideas, we went to conferences on humane pedagogy. Valentina Mikhailovna and I became friends. And still we keep in touch.

Tatiana Vladimirovna Parkhomenko was my mentor as a teacher of Russian language and Literature. We were working in neighboring classes, giving pieces of advice each other, she was sharing ideas with me about lessons, projects. It was a great help. And when I was taking part in competition "Teacher of the year", Larisa Petrovna and Tatiana Vladimirovna helped me more than anybody. It was an enormous support.

Now I also have people who is helping me. It is Larisa Alexandrovna Kotelnikova. She is my ideological mentor. Larisa Alexandrovna shares experience and her methods of teaching with me.

**As for me, School 222 is...**

When I hear "School 222" I want to continue the second

part of our slogan: "is our friendly family". The school is associated with a family and sincerity.

**What did I have to overcome..**

At first I didn't know how to organize children. Later it became better. Students started listening and hearing me, I found the way how to communicate. Now it's simple because some experience lets me work with pleasure.

**My advice for starting teachers.**

Now I am a tutor of young teachers who started work in our school. First of all, my advice is to be humane, but you have to use authority sometimes. Children feel when teachers like them, they appreciate it. You should remember about it.

Young teachers spend lots of time at school. But it's impossible not to forget about yourself and your health. You should spend time with family. And don't be afraid of problems!

**Antsupova Alice.**

## Autumn reboot

Finally, after a hot summer, the main holiday of all schoolchildren came - the Day of Knowledge! On the first of September, assemblies and first lessons were traditionally held, which gave a start to the new academic year. On this day, an event was planned to coincide with the 10th anniversary of the Rosatom School project - an annual Children's Quarter, the program of which this year was called "September Reboot". Due to weather conditions, the holiday took place on the second of September. It was held in the format of a game, at each of which children from all schools of the city had the opportunity to take master classes of completely different directions.

Also, a mini-exhibition was organized on the site with the participation of the work of the winners of the competition held in 2019 in our city, on the basis of our school, "Artatomcity", where children from the cities of the State Corporation ROSATOM painted the landscapes of the city and exchanged their artistic experience. The site was visited not only by the Head of the city, but also by Irina Anatolyevna Sizova, Deputy Head of the city, and Elena Vasilyevna Anikina, head of the Department of Education. The guests from the administration were presented with paintings of the winners of the Artatomcity competition, students of our school.

In addition to the batik master class, the team of the art department organized a task for the quest, which was performed by the teams of the city's schools. Their task was to perform their own piece of the Rosatom School emblem in the batik technique. We can say with confidence that the students did their best, and the picture turned out to be bright and fascinating!

The "September Reboot" ended with a general flash mob in the central Park of culture and Recreation.

We hope that the whole academic year will be as energetic as this dance!  
**Volkova Daria**

## Honoring the winners

From September 6 to 9, the Health and Leisure Center hosted the awarding ceremonies for participants of the city competition of public initiatives "My House, my Yard". This year the competition was held for the 12th time. The aim of the contest participants is to improve the courtyards, which makes our city even greener and more beautiful.

The winners of the competition were honored by the best teams of the city for four days in a row. The vocal studio "Dessert", the soloist of the popular music studio "Elon", the accordion player Herman Amelin, the male vocal ensemble "Artel" and the Exemplary folk singing Studio "Oddity" gave a good mood to the guests. In vocal club called «Curiosity», students of the 10th "A" class, Daria Volkova and Sofia Koroleva congratulated the activists of the city.

"It is very nice to see the joyful faces of the audience, to hear their stormy applause in response to our performance. I am pleased to be a part of such a celebration!" - Daria Volkova shared her impressions.

Let's hope that the tradition of organising this competition will continue.

**Koroleva Sophja.**

## Father's Day

On October 17, the pupils of the collectives of the Palace of Culture "Sovremennik" congratulated their beloved defenders of their lives on Father's Day. In addition to video greetings, "Great Father" contest was held on the official site in VK group, where children and teenagers of the Sovremennik collectives composed poems and published pictures, glorifying their fathers. There were 18 winners out of 18 contestants, which means that every father is a winner.

On October 18, Father's Day events were also held at school # 222. So, students of year 3

"A" made not only greeting cards, but also new shirts for their dads at a technology lesson. In addition, a photo exhibition "Dad is not your mom" was opened in the hall of school.

## Kinomania. Are you cinema-lover?

This year, we are introducing a new column "Kinomania" (for cinema-lovers) in our newspaper. In each issue we will tell you about a movie. If you want to announce a movie that you liked, please contact us. We will definitely tell you about it in our section!

The films "The Conjuring" are on the agenda today. The universe of "The Conjuring" (an American horror film series) includes many films, but we will review the main films. Currently, the franchise consists of three films in the main series, "The Conjuring" (2013), "The Conjuring 2" (2016) directed by James Wan and "The Conjuring 3: By the Will of the Devil" (2021) directed by Michael Chavez.

In all three films, paranormal researchers Ed and Lorraine Warren are looking for the cause of strange things happening in the homes of people who have asked them for help. A high-quality picture, excellent acting, a well-conveyed atmosphere - all this helps us "to dive" into the film, feel everything that the main character is experiencing.

It would seem that all these films are only based on ghosts, demons and other horrors, but this is not the case at all. In each part families with children who get into trouble. And every time, not only the Warrens help to cope with evil, but also the families themselves. Love, mutual understanding, cohesion play an important role.
